

NutriFlor®

AN IMMORTAL PROBIOTIC
REBALANCING OF THE HUMAN MICROBIOTA

NUTRIGEA®
your health at 360°

NUTRIGEA®
Your health at 360°

NutriFlor® is a very powerful probiotic supplement, based on “immortal” probiotics and the super-strain Acidophilus DDS-1. Widely used for years all over the world, DDS-1 is an human indigenous strain, originally taken from the human intestine and cultivated by the prestigious team of Dr. Shahani of the University of Nebraska. This strain resists well to the different environments of our gastrointestinal tract and unlike most of the other strains, which are thermophilic and thrive at temperatures around 44 ° C, DDS-1 prefers the typical temperature of the human body (37 ° C). DDS-1 has repeatedly shown that it can cross the gastric barrier unharmed and reach the intestine, which is able to colonize rapidly, antagonizing pathogenic bacteria such as Escheria coli. But what makes DDS-1, and the other strains contained in Nutriflor (such as Bifidobacterium, Ramnhosus, etc.) so powerful, is the synergy with Klamath algae, which is what makes them super-vital and much more powerful against pathogens.

WHY “IMMORTAL”?

Through our research, we found (and patented our discovery) that by adding Klamath algae to the culture of friendly bacteria, they increase greatly their vitality: while in ordinary cultures, bacteria such as acidophilus and bi dus grow for no longer than 48-72 hours, if they are cultured with Klamath algae they keep growing indefinitely, and they also triple their ability to kill off E. Coli, Staphiloccus Aureus, Candida and all sort of pathogens

NUTRIFLOR® IS RECOMMENDED FOR:

- reduced or impaired intestinal microbiota
- flatulence and indigestion
- inflated belly
- probiotic support during or after antibiotic therapy;
- immune system support;
- vaginitis, urinary tract infections and candidiasis (in synergy with AlgoZym);
- post-flu recovery and respiratory problems;
- osteoporosis;
- unbalanced cholesterol.

METHOD OF USE:

2-4 capsules per day, on an empty stomach

DOES NOT CONTAIN GLUTEN

Available in packs of 30, 60 and 180 CAPSULES.
